

Project Location

VICINITY MAP

**State Project No. 713-62-0007**  
**Wood Road Bridge Over Alligator Bayou**  
**West Carroll Parish**  
**(Estimated Construction Cost: \$444,819.50)**

At the time of programming, the structure was structurally deficient and load posted at 10-15 tons. Subsequent to the programming of this structure, the Parish removed the old bridge and put in a temporary fix to keep local car traffic moving through the area. The temporary fix has created stream erosion problems.

The construction of this project will help small contractors pay for equipment loans and payroll overhead.
